I'm a Software Engineer at BearTech, where I build fullstack web and mobile products with TypeScript, React, Go and Python. I work on new features and existing systems alike, and I'm involved in architecture decisions for services, APIs, data models and our AI pipeline. I care about code quality, reviews and the standards our team follows. I first got into coding through a freeCodeCamp course, and my interest in problem solving grew into a career change via the Northcoders bootcamp. Outside work I'm happiest learning something new, whether that's Spanish or the community projects I get involved in. I'm excited to bring my fullstack experience, and everything I've learned in other industries, to help your team achieve its goals.

Technical Skills

- **Languages:** JavaScript, TypeScript, Go, Python, HTML, CSS, C#, Dart
- **Testing:** Test Driven Development (TDD), Jest, React Testing Library, Vitest, Supertest
- **Back-end:** Go, Python, Express (Node.js), PSQL, REST APIs
- **Frameworks:** React, React Native, ASP.NET, Next.js, Flutter
- **Tools & Cloud:** Docker, Azure, CI/CD (Bitbucket Pipelines), WebSockets, Git
- **Soft skills:** Paired programming, technical communication, agile, SCRUM methodologies

Projects

[Where to Go](#) – JavaScript | Next.js | Tailwind CSS | PSQL – [GitHub repository](#)

Where to Go allows users to search for and organise travel itineraries based on their preferences. I worked on a team to build it using Next.js and Tailwind CSS, enabling sharing, commenting, and filtering by budget, location, or trip length.

[Job Tracker](#) – Dart | Flutter | Hive

Job Tracker helps job seekers stay organised by tracking applications, interview dates, and job statuses. Built in Flutter with Hive for local storage, it allows users to search saved applications and is available on the Google Play Store.

Experience

Software Engineer – BearTech, November 2024 – Present

- Work across the full stack on customer-facing web and mobile products: TypeScript/React frontends, React Native mobile apps, Go backend services and Python AI tooling.
- Migrated a large JavaScript codebase to TypeScript in strict mode, improving reliability across the team's projects.
- Own design decisions and end-to-end delivery of specific features, from architecture through implementation to deployment.
- Build and maintain CI/CD pipelines (Bitbucket Pipelines), containerise services with Docker, and manage deployments and image repositories in Azure.
- Implemented real-time features using WebSockets.
- Optimised an AI ingestion engine, significantly reducing token usage and processing time, and improved overall application speed and user experience.

- Write and maintain tests across the stack, including React Testing Library and Vitest on the frontend, and test suites for Go and Python services.

Trainee Software Developer – Northcoders Software Development Bootcamp, March 2024 – May 2024

- Coded using both Object Oriented Programming and Functional Programming.
- Studied industry best practices including Test Driven Development and Pair Programming.
- Used documentation including MDN and framework-specific documentation.
- Created and interacted with servers, including using Express and Axios.
- Utilised Front-end libraries and frameworks including React and React Native.

Career Break – Sept 2023 – Feb 2024

I spent 5 months travelling in Southeast Asia, gaining new experiences whilst learning coding basics.

Finance Administrator – University of Sussex Students' Union, April 2023 – Aug 2023

- Input the daily banking system into Excel to track daily sales and profits, and used Sage 50 for invoice creation, reconciliation and processing.
- Chased aged debtors through email and telephone, significantly reducing outstanding debt.

Earlier Roles – Customer Service & Retail, Nov 2017 – Aug 2023

- Customer Service Assistant – Southern Co-op, Sep 2021 – Aug 2023: managed cash tills and self-service checkouts, assisted customers with queries and complaints, and used technology to track stock gaps and pricing errors.
- Assistant Manager – Cancer Research UK, Oct 2018 – Aug 2020: supervised paid staff and volunteers in the shop manager's absence and helped maximise profits through visual merchandising, new sales streams and generating donations.
- Duty Manager | Cashier – Kosher Kingdom Supermarket, Nov 2017 – Sep 2018: assisted customers on the shop floor and resolved queries and minor EPOS issues in a fast-paced environment.

Education

University of Sussex, Sep 2020 – June 2023

- BSc. Ecology, Conservation and Environment with Spanish | First

Morley College London, Sep 2019 – June 2020

- Access to HE Diploma in Science | Distinction

Hobbies and Interests

- **Cooking & community:** Amateur chef; as President of my university's Food Waste Café Society I helped students access affordable, sustainable food and ran cooking classes and pop-up cafés.
- **Languages & travel:** Whether it's Spanish or JavaScript I enjoy learning languages, and lots of solo backpacking has shaped how I see the world.
